Foreword

It has been our unique privilege to catalogue for sale so magnificent an offering that we could call it, without fear of contradiction, THE WORLD'S GREATEST COLLECTION OF UNITED STATES SILVER COINS.

The opportunity afforded us to be "of distinct service to the numismatic fraternity" seemed at once apparent. By supplying the standard attributions and by reprinting those Reference works which are difficult to obtain, we "have made it possible for many collectors to properly attribute their coins". It has enhanced their collections and "made numismatists of many collectors". The quotes will be recognized by many of you. They are your statements which accompanied your orders for the BOUND VOLUME.

Those who have not yet ordered this "library in one volume" are referred to the inside covers of this catalogue and are urged to act promptly.

As for the features of these concluding sections, really, they are too many to list. The 2c, 3c silver, 3c nickel and 5c nickel series are complete. The half dimes are attributed to Valentine and the half cents to Gilbert. The latter series offers 4 varieties of 1793, 6 of 1794, 7 of 1795 as well as a splendid 1796 and the rare proofs of 1836 to 1857.

The series of dimes offers a new standard work on the subject and includes the excessively rare 1894-S in proof condition. The plates and illustrations have been prepared under the direction of Abner Kreisberg and the attributions are by A. Kosoff.

Thanks are due to William L. Clarke of the American Numismatic Society for his valuable assistance in connection with the photographs and to William G. Bradshaw of the Bradshaw Printing Co. To our many friends for their encouragement and support, may we express our sincere appreciation and the hope that we may continue to serve them.
